

# WORKSHOP FURNITURE AND EQUIPMENT

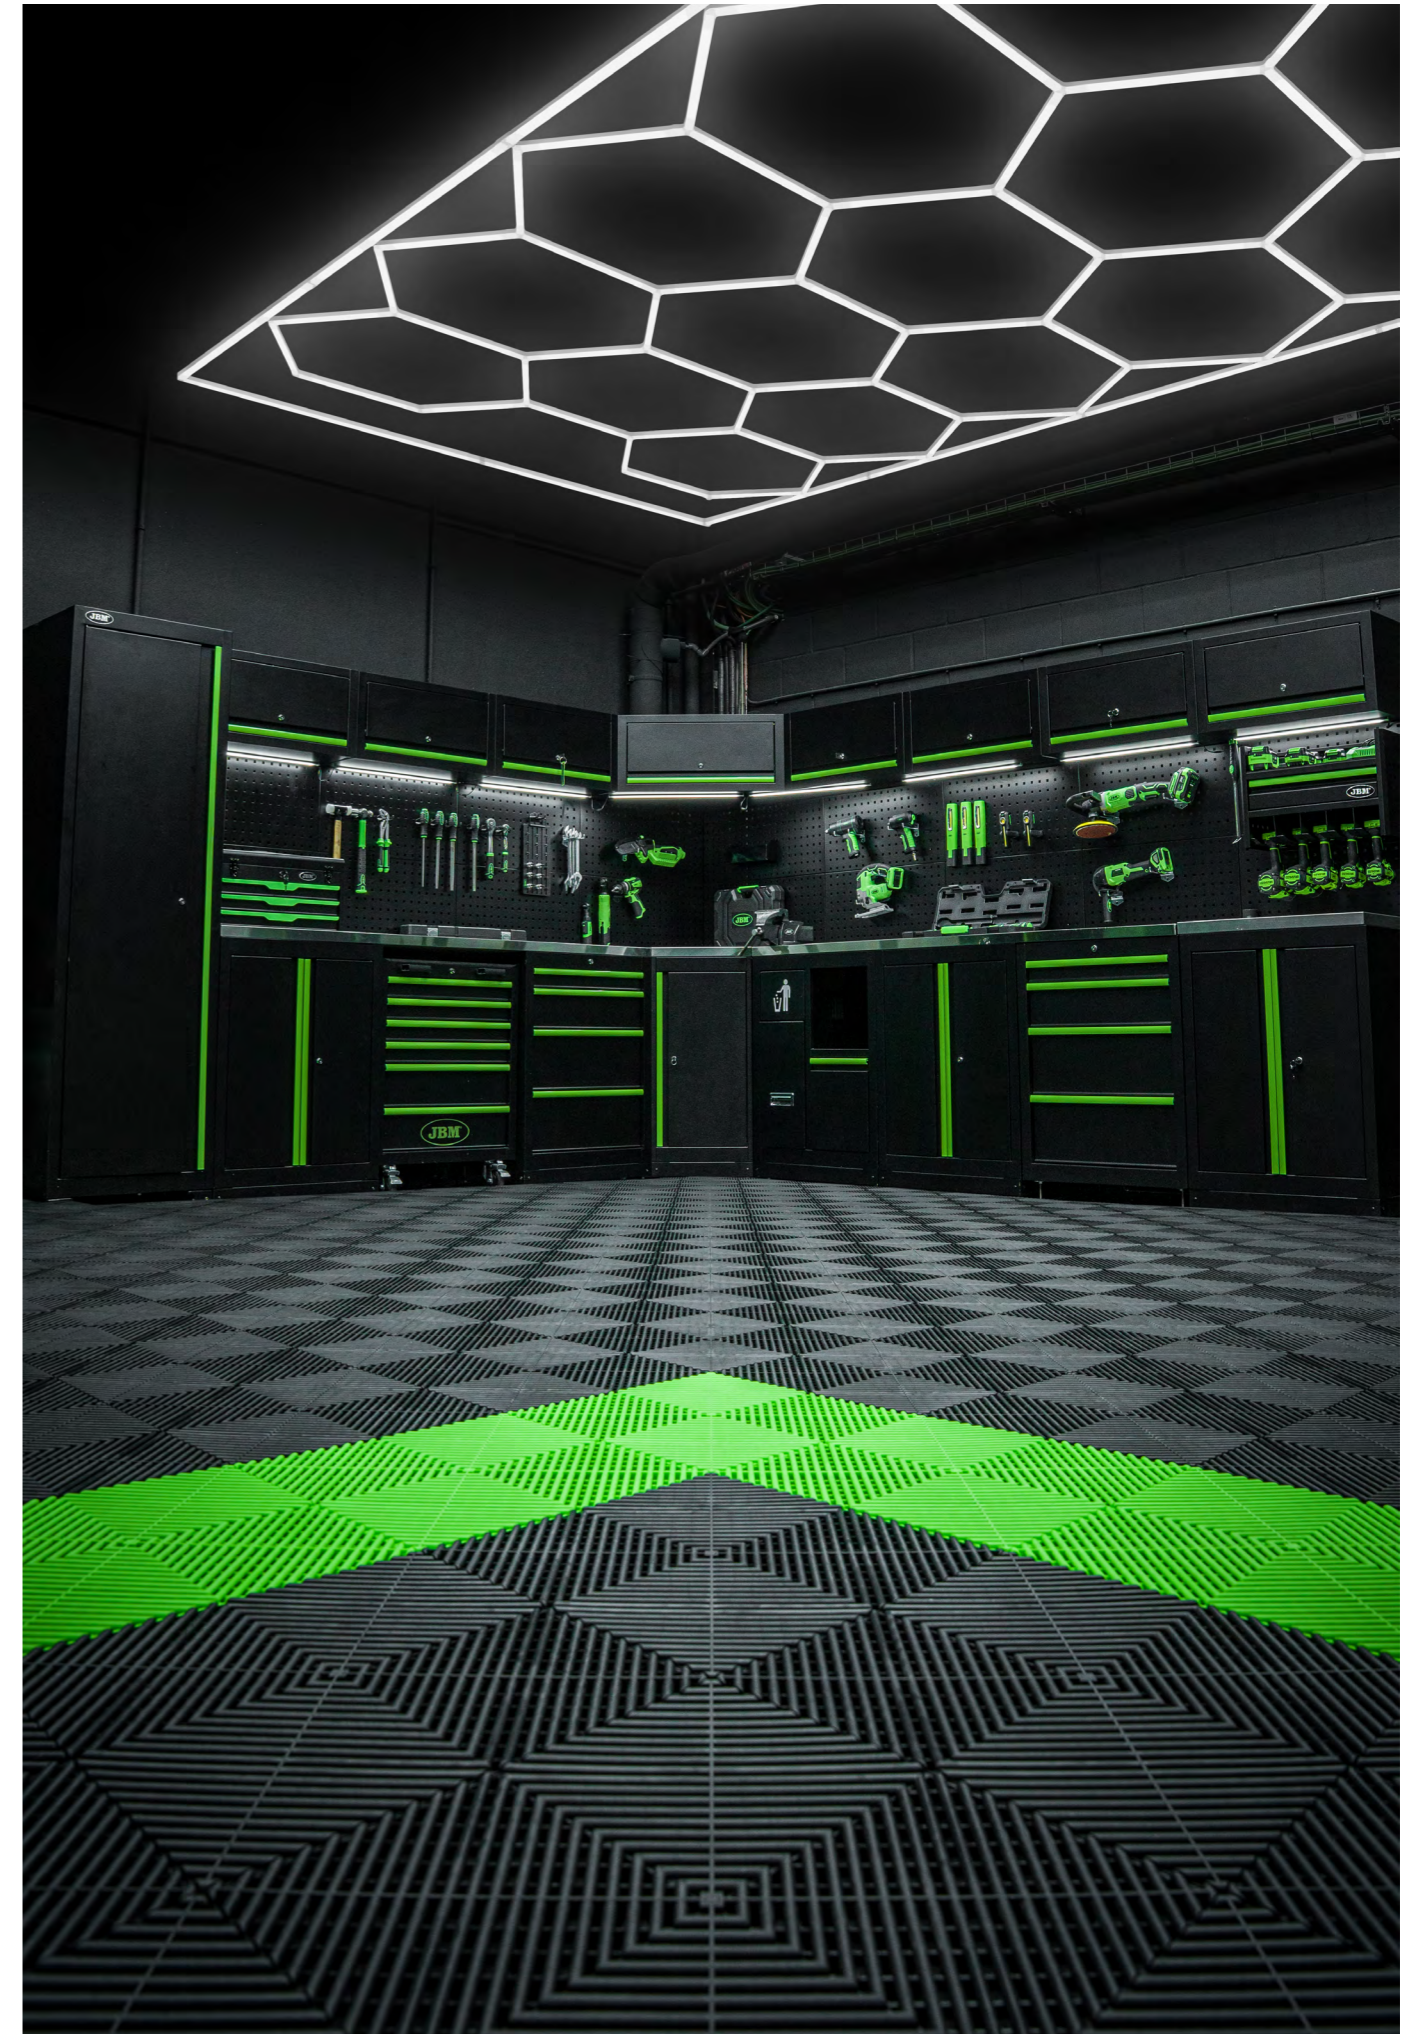

2026

## New range of workshop furniture

### Modular system

Create your work environment from scratch, adapting it to your space and needs with multiple combinations of our furniture

## The color of your brand, now on your tool trolley

You can easily and quickly customize your set to match your workshop's corporate colors. A practical personalization method that helps you maintain a professional and consistent image in your workspace.

## If you already have our furniture sets,

Don't worry – we have prepared handle sets for each SERIES as well as for each individual module. You just need to choose the color you like most and provide us with the reference, so we can prepare your order. This way, you can personalize the product and adapt it to your workshop's style, keeping a consistent visual identity.

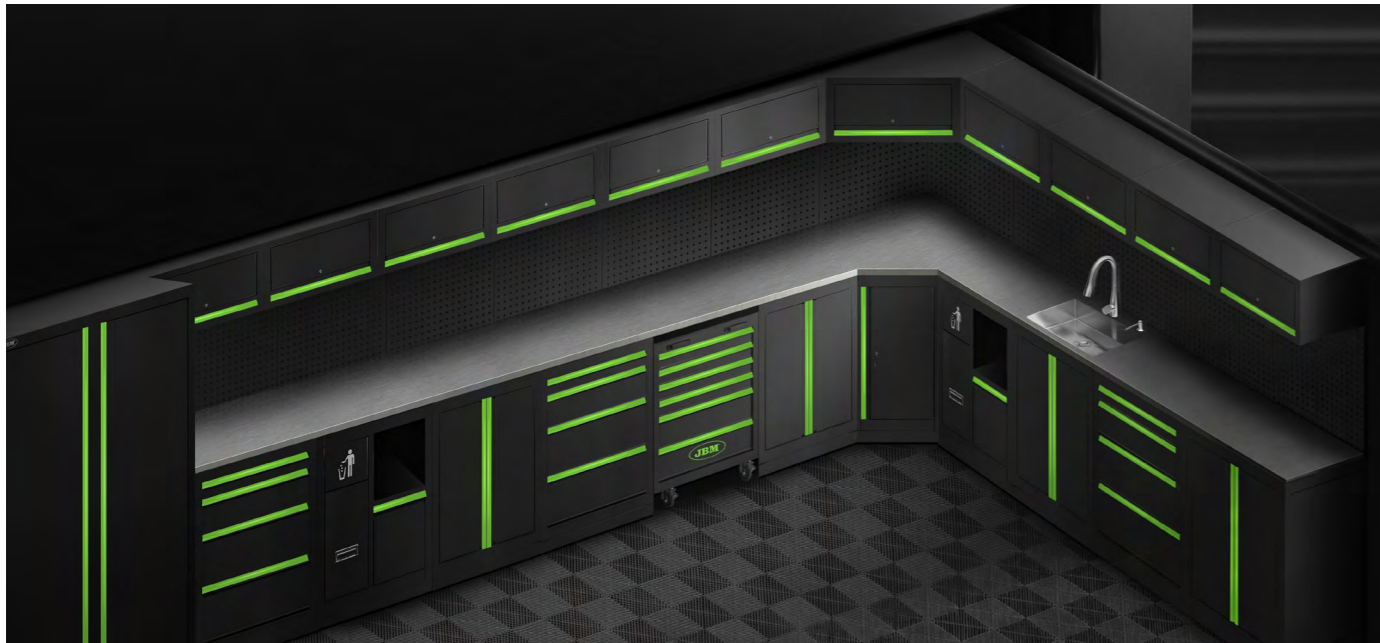

## JBM Configurator

At JBM, we offer a web platform that allows you to design and customize your furniture through a complete 3D model with real-time visualization. As you configure each element, the system automatically generates a full render of the space with all selected furniture and a detailed list of the products required for its construction. As a result, you obtain an accurate, up-to-date quote fully aligned with your design.
